A senior author of the paper is at least a PhD supervisor, and the other authors in the paper are trainees or junior researchers

What's New In?

The user interface of the application is rather simple and clear. The program is available in 3 languages: English, German and Dutch. The program includes approximately 100,000 words and their translations in the dictionaries. Features of IntenseVT Portable: The following features have been implemented into the app: You can look up your results by typing the word in the right box and then clicking on the relevant image. You can also click on the image to view the translation in one of the three languages. You can choose the order in which you would like to see the results displayed (faster/slower) in the search dialog box. The results can be saved to be recalled at a later date. It is possible to add new entries by simply writing them in the text box. You can specify the spelling (by adding dots to the end of each word). You can save your favourite words to favourites and get suggestions for new words. You can choose a random word or the first one you have selected. You can choose to skip or limit the number of results displayed in the search box. You can choose to skip or limit the number of results displayed in the main window. The result windows can be docked in the windows or minimised. You can choose the minimum word length you would like to see in the results. You can choose the maximum word length you would like to see in the results. You can also choose the maximum number of words you want in the results. You can quickly change the colour of the display between black or white. You can save the dictionary files in the portable version. The dictionaries can be created from a set of random words, from English (and other languages) or from wordlist files. The application has been written in a portable way (allowing it to run on both Mac and Windows). You can choose to display words by their English, German or Dutch spelling. You can choose to display the words by their English or Dutch translation. You can define how long it should take to display the next result in the search dialog box. You can define the order in which the results are displayed (faster/slower).
