- Pra ver uma música você tem que recorrer a uma arte de produção, e o som começa a trabalhar agora, o que aconteceu com o Arlindo Cruz e Sombrinha é . Encontro com Arlindo Cruz e Sombrinha – Novo Diapasão. Reveal that the music production of Arlindo Cruz and Sombrinha was very similar to the former OJB Project,” says Cornell. “I mean, it's so similar to have been produced by Arlindo Cruz and Sombrinha and OJB.” . - - Direction-controlled synthesis and properties of core-shell structured silver nanoparticles by high-power ultra-high vacuum microwave irradiation. We investigated the feasibility of synthesis of core-shell structured silver nanoparticles (CSNPs) in the solid state using a pulsed high-power ultra-high vacuum microwave irradiation technique. CSNPs were successfully prepared with various shell thicknesses (1-5 nm) and controlled shapes (spheres, rods and branched) for the first time. The effects of power and irradiation time on the properties of the CSNPs were systematically studied. The resultant CSNPs had a regular morphology with 5 nm of shell thickness. The surface plasmon resonances (SPR) of the CSNPs were very sensitive to the shell thickness; the peak wavelength shifted from 520 to 652 nm with increasing shell thickness./* Simple DirectMedia Layer Copyright (C) 1997-2019 Sam Lantinga This software is provided 'as-is', without any express or implied warranty.
