What's New in the?

Newer version comes with few tweaks POSSIBLE MAJOR FEATURES

- ADDED IN THE LATEST VERSION
- 1) WebP Lossless Mode now included, check it out! To give you a webp backup option if needed.
- 2) Compression Now! The lossless mode now comes with the ability to do full compression.
- 3) Improved Webp decoding support Starting with version 1.2.0, WebP Lossless Mode now comes with an improved Webp decoder, which now follows the recommendation and standard of Webp, and is able to extract the very first Webp frames from the image. This means that now, when lossless Webp compression is on, no Webp file has any further frames dropped, but only the frames from the first webp file are extracted. Webp Lossless Mode works like any other lossy Webp compressor.
- 4) Added option to save webp files directly to file system That way you can save to any location, instead of defaulting to desktop.
- 5) Added option to save webp files to a folder you specify Easier than remembering to set the desktop location, so it's all done for you.
- 6) Improved edit settings in image toolbar Fixed an annoying issue where occasionally, the image size tab would load to the size that it was saved to, not the original size.
- 7) Added a warning to not to use the "Launch in background" feature of WebP Lossless Mode, because that would keep your computer from sleeping.
- 8) Fixed some other bugs
- 9) Minor clean up

V1.2.0 - September 23, 2015

- 1) Added the option to Launch WebP Lossless Mode to the main executable without having to do a double click on it.
- 2) Fixed an annoying bug where, the image size tab would load to the size that it was saved to, not the original size.
- 3) Fixed a bug where, when saving images from the 'Custom size' tab, the "Launch in background" function wouldn't turn back off.
- 4) Fixed the bug in the webp picture editor where the frames would go missing when saving to a folder.
- 5) Added an option to save the webp files directly to the file system, instead of saving to the Desktop.
- 6) Made some other bug fixes and changes.
- 7) Cleaned up some of the look and feel.

V1.1.1 - September 21, 2015

- 1) Added the option to Launch WebP Lossless

Mode to the main executable without having to do a double click on it. 2) Fixed an annoying bug where, the image size tab would load to the size that it was saved to, not the original size. 3) Fixed a bug where, when saving images from the 'Custom size' tab, the "Launch in background
