### What's New In IIS Diagnostics Toolkit?

This toolkit is a package of utility tools that works with IIS 3.5 and newer. This package is used in production environments today and will continue to be used as IIS moves from 2.0, 2.0a, to 3.5. Changes in v0.1.0.0 v0.1.0.0 - 24 May 2007 ----- This version consolidates the classic W3SVC.exe, W3SVC32.exe, IIS/WAS/WFT, and IIS/WAS/WDP tools. All of these tools have been written and maintained by the fine folks at Microsoft and are all available via the download package. Update notes: - IIS: W3SVC.exe was used by classic IIS 2.0 to help trace the root cause of many types of problems. W3SVC.exe is now replaced with W3SVC32.exe in 3.0 and newer. - W3SVC32.exe and W3SVC32.dll have been consolidated into W3SVC32.exe and w3svc32.dll. Changes in v0.0.8.0 v0.0.8.0 - 18 November 2005 ----- In this release we have replaced the standalone classic W3SVC.exe with the combined tools.
