I'm trying to send a test sms to my wife and both apps let me put in the phone number and the message I want to send, but when I send it I get 1: SMS isn't supported on this device. I've tried Rebooting Checking the 'Clear Data' option in my phone settings, and even wiping my phone data I'm running Android 4.4.4 on a Nexus 6. A: Rebooted phone, re-programmed SIM, it worked this time. I'm not sure what caused the error, but hopefully this will help anyone else trying to use their handset for SMS. HBS President Joanne Ely announced Aug. 8 the introduction of a new incentive and retention program, the HBS Senior Leadership Awards. The awards are intended to celebrate HBS graduate employees who contribute to the success of the program. The winners are entitled to a one-year sabbatical at home or abroad and often attend a reception held in their honor. "The HBS community is very fortunate to have a large number of amazing, dedicated and hard-working current and former employees who have earned these prestigious awards," Ely said. "This is the type of recognition that provides meaningful recognition for the significant contributions these individuals make to HBS." Ely said the HBS Senior Leadership Awards are a continuation of the Alumni Association's previous efforts to recognize employee career accomplishments. The Alumni Association has also introduced the Alumni Performance Award, which was presented at the fourth-annual HBS Career Fair in April. The Alumni Performance Award recognizes business school alumni who have distinguished themselves in leadership in their organizations. The 2017 winners will be presented at a reception in September. While the Alumni Performance Award and HBS Senior Leadership Awards aim to recognize exceptional achievements in careers at HBS, the HBS Distinguished Scholar Award, currently the largest of HBS

I've tried to do the same with HttpClient and it worked, but only in the HttpClient example it's required to pass in a Credentials object. Here is my code: The server that I'm trying to make the request to requires a custom body. import { Injectable } from '@angular/core'; import { HttpClient } from '@angular/common/http'; @Injectable() export class HttpService { constructor(private http: HttpClient) { } executeHttpPost(url, body) { this.http .post(url, body) .subscribe((data) => { console.log(data); }, (error) => { console.log(error); }); } } and here is my code: import { HttpClient } from '@angular/common/http'; import { HttpClientModule } from '@angular/common/http'; @Injectable() export class AuthService { constructor(private http: HttpClient) { } postAuth(body: any, headers: Headers) { let headers = new Headers(); headers.append('Authorization', 'Basic'+ '5
