File formats The native file formats of AutoCAD are DXF and DWG (drawings). Other formats supported by the application include PDF, PostScript, SVG (vector graphics), TIFF (for 2D raster images), and a range of other image formats.

Extensibility The extensibility of AutoCAD is mostly provided by plug-ins. The program has a number of "standard" plug-ins (such as

Plotter, DraftSight and others), and also supports third-party plug-ins created by users. These include commercial and third-party applications designed to extend AutoCAD functionality. AutoCAD is available for purchase with most versions of Windows. AutoCAD also features an API for software developers to integrate AutoCAD drawing functionality into their own products. The Application Programming Interface (API) is supplied by the software developer community and also through third party Autodesk distributors and Autodesk's Autodesk Exchange website. History AutoCAD was originally developed by Micrografx for the PC (microcomputer) market in the early 1980s and had many names and versions. It was renamed to the current AutoCAD name after its transition to Windows in the early 1990s. Autodesk made AutoCAD available for download on the web in 1997. Products There are AutoCAD versions for Windows and Macintosh computers. AutoCAD LT AutoCAD LT is a

freeware version of AutoCAD, which can only be used on a personal computer. It runs on Windows 7, Windows 8, Windows 8.1, Windows 10 and macOS, and supports 32-bit and 64-bit versions. Reception and legacy In the late 1980s and early 1990s, AutoCAD LT was the most widely used CAD program for MS-DOS. Some of its users also used it for desktop publishing and for creating charts and graphs for the business world. AutoCAD LT had the widest compatibility with other third-party CAD programs than any other AutoCAD product. It can load DWG, DWF, DGN, DXF, and other file formats. It can also connect to and import data from Microsoft Excel, Lotus 1-2-3, and Quicken. It supports 4D stereolithography and can also generate 3D models. It can import and export in various formats and has a large document library that can contain ca3bfb1094

(WHAS11) - A Louisville police officer is under investigation after a child's photo was taken by the officer's unmarked squad car while they were using radar. The January 9, 2018, 2:19 a.m. photo at the top of this post was taken by the Chicago Police department on Tuesday, Jan. 2, 2018, at the intersection of 111th Street and Artesian Avenue in the South Shore neighborhood. The police officer who was driving the unmarked squad car was using the radar at the time the photo was taken. The officer driving the unmarked squad car in the photo has been on the department since November 2017. Upon learning of the photo, the officer was placed on administrative leave until the investigation is complete. "The CPD has a zero tolerance policy for the use of police camera systems to obtain a photo or video of a person in a motor vehicle with the expectation of publication in the media," said Louisville Police Department Sgt.

Tommie Stover. "The public expects that when a police officer uses a police camera system to obtain a photo or video of a person in a motor vehicle with the expectation of publication in the media, that such a photo or video will not be released." The officer
