Having the free CISSP study materials on Cbt-nuggets.com is one of the best ways to prepare for the test. Before going through the materials, make sure that you have a couple of hours at your disposal and schedule the CISSP exam two days before your test. That will help you to focus on the course. You need to be comfortable with the material you've just learned to get the best score. If you've taken the CISSP exam before, you might want to read the manual that comes with the exam, but I found that I didn't need to. The exam is composed of multiple choice questions, and there's not a whole lot of reading required. Instead, you're reading the responses you get for each question and making sure that what you thought was the correct answer is in fact the correct answer. If you're really serious about passing the CISSP exam, you can take the prep course in any order you want, and it's recommended that you take it in order from the most easiest to most difficult. The prep course also includes practice exams, and all the exams are multiple-choice. To pass the exam, you need to get a score of at least 620. You can retake the prep course multiple times if you take it more than once, but you can only retake the exams once. It's wise to take the prep course as early as possible. Note: the prep course is a free resource offered by CBS Interactive to help you prepare for the CISSP exam. The prep course can be downloaded or streamed and can be used in any order, and there's no obligation to purchase anything. It's a great way to get the most out of your prep for the CISSP.
