I am just starting to learn Delphi programming. I want to write a simple program that should read from the keyboard and write to a file a text consisting of Cyrillic letters and a number. For example: "123" and "11111". To do this, I downloaded the MS-DOS 6 program.22 from an Internet and installed it on my computer. To run this program, I created a virtual disk d: and named it "MS-DOS 6.22". I ran this program and it works.
