
Windows 8 For Psp V12 Build 107 18

this issue was addressed in kb5011493. some devices might take up to seven (7) days after the installation of kb5011493 to fully address the issue and prevent files from persisting after a reset. for immediate effect, you can manually trigger windows update troubleshooter using the instructions in windows update troubleshooter. if you are part of an organization that manages devices or prepared os images for deployment, you can also address this issue by applying a compatibility update for installing and recovering windows. doing that makes improvements to the

safe operating system (safeos) that is used to update the windows recovery environment (winre). you can deploy these updates using the instructions in add an update package to windows re using kb5012414 for windows 11 (original release). devices that have the "unknown device" messages are often created when creating a custom offline media or iso image from a windows installation. the issue is only encountered when creating custom offline media or iso images from windows installations created by slipstreaming this update into the image without having first installed the standalone servicing stack update (ssu) released march 29, 2021 or later. this issue was addressed in kb5011493. some devices might take up to seven (7) days after the installation of kb5011493 to fully address the issue and prevent files from persisting after a reset. for immediate effect, you can manually trigger windows update troubleshooter using the instructions in windows update troubleshooter. if you are part of an organization that manages devices or prepared os images for deployment, you can also address this issue by applying a compatibility update for installing and recovering windows.

Windows 8 For Psp V12 Build 107 18

this issue was addressed in kb4018684. some devices might take up to seven (7) days after the installation of kb4018684 to fully address the issue and prevent files from persisting after a reset. for immediate effect, you can manually trigger windows update troubleshooter using the instructions in windows update troubleshooter. if you are part of an organization that manages devices or prepared os images for deployment, you can also address this issue by applying a compatibility update for installing and recovering windows. doing that makes improvements to the safe operating system (safeos) that is used to update the windows recovery environment (winre). you can deploy these updates using the instructions in add an update package to windows re using kb4018686 for windows 11 (original release). if you are running windows 10, version 1809, the cumulative updates released to the version 1809 branch of the general availability (ga) channel will be updated to the windows 10, version 1903 ga channel when you upgrade to windows 10, version 1903 from windows 10, version 1809. to avoid this issue, be sure to first slipstream the ssu released march 29, 2021 or later into the custom offline media or iso image before slipstreaming the lcu. to do this with the

combined ssu and lcu packages now used for windows 10, version 20h2 and windows 10, version 2004, you will need to extract the ssu from the combined package. use the following steps to extract the ssu: beginning with windows 10, version 21h2, feature updates for windows 10 release are released annually, in the second half of the calendar year, to the general availability channel. they will be serviced with monthly quality updates for 18 or 30 months from the date of the release, depending on the lifecycle policy.
