## Volvo S40 Radio Code Hu 605 Calculator Fre

I bought an older Volvo S40 from a classified advert for £595, it was completely stripped down, had no clocks, no radio and its only redeeming feature was a working door lock. This machine is obviously a completely different model to my radio and does not have the same code. Any ideas where I can find this code? I had to send my car to be fixed. The dealer had trouble and had to drill out the trim on the radio. I then returned the car. Now it won't work, but I want to be able to play my music and phone via my USB stick. The only way I can find the code is to flash the radio with my stereo and find out what the code is... etc My car is a 1995 Volvo 850 with 185000 miles. Any suggestions? Hi. I have a radion hu-460. It was working fine, but after some time the radio's signal went completely dead, the radio continues to play music of its own and i have no idea how to access the unlock code. The connector (I assume) has been damaged, and its missing the pins that were in the old connector. What should I do? Thanks I have a volvo, and I want to get my radio to work again. The volvo dealer says it will need to be replaced due to the fact it needs to have the code. I cant find it anywhere. the radio has been in our garage since 4/2008. In October last year, I put a high test battery in the unit and it did not work at all. I put in a different battery and still no luck. I then called the volvo dealer and they told me to call another company so I have yet to finish that call. they want to charge me about 80 something vat, which I think is way too much. thanks if you can answer

## Volvo S40 Radio Code Hu 605 Calculator Fre

Hello I have a 1999 Volvo S40. I disconnected the battery and tried to re load the radio but it was still displaying the same code. I have lost track of the code my friend entered before he went to the dealer to fix the code. He told me it was 605.

Hello all, I just bought a 2002 v90. It has code 528, and its a pas. I ran out of battery and was pulling the key out to get a new one and it didn't work.

---

I put it back in and it went to the message "VOLVO" but it said "CODE:528". I ran out of battery again, and the car is still plugged in, and have a new battery for the v90. Now the message is "VOLVO" "CODE:058. Can anyone tell me what I need to do? I have a 2001 Volvo S40 C and recently found out that the radio had a wonky battery, and that was why the car would not start. The code was supplied by the dealer and is nothing special, it is 1202. I

---

used it some months ago to stop the radio only to find that the code had no effect. As soon as I was able to get the car to start again the radio began acting funny, so I called the dealer and they were no help. After a lot of research I found an article here with the same code and similar problem, but the fix was rather involved, but I took a chance on it and it worked. I then phoned the dealer and told them the fix worked, and they said they

---

could not do anything about it if their repair manuals do not list it as working. Therefore I have given up on the radio and never even took it in to the dealer for a change. I am now just about to give the radio away. I thought I would ask if anyone else has had success with this radio and can offer a simpler fix.
