While the gender difference in social behavior, on average, is small, it is not a zero-sum game, and this results in phenomena that, superficially, seem to be "socially Darwinian". In the extremes of both genders, a larger degree of Neanderthal traits are evident, such as food selection, caloric intake, and propensity to, and reaction to stress. Delivered by twelve experts from world-renowned neuroscience research and clinical institutions, this new, accessible book explores the effects of hormones and genetic differences, the
