The clear history feature lets you also do a screen shot of the page you are working on. The best part is that you can share via Facebook or via e-mail. Lightroom now features powerful new non-destructive editing tools that can handle all your content, from RAW files, to TIFFs, to JPEGs—at the same time. This means you can quickly convert a RAW file into a high-quality editable JPEG, and you no longer have to use the temporary files created during the conversion process. And with the latest update, Lightroom is the only photo application that gives you real-time previews of edits, with the ability to continue to make changes seamlessly within the same editing session in Photoshop or Adobe Camera Raw.
